During Operations:

a. Prior to construction, topsoil will be removed and stockpiled.

b. Developmental rock will be stockpiled on a designated area which will insure the hydrologic drainage of the area.

c. A diversion ditch will be constructed above the mine portal.

d. Mine dewatering will be under the authority of an N.P.D.E.S. permit.

e. Mining activities will be conducted in such a manner as to minimize visual and environmental degradation to the area. Disturbance will be limited to approximately 9 acres.

f. Mining will be conducted in a safe, sound, technical and prudent miner-like fashion.

After Operations:

a. Comply with all requirements of Rule M-10, Reclamation Standards, wherever a variance has not been issued.

b. Edges of waste rock stockpiles will be rounded, compacted surfaces will be scarified, topsoil will be respread and the area reseeded with a grass-shrub mixture. The area will be monitored for revegetation success and will be reseeded if necessary.

c. If grazing pressure is excessive, the reseeded area will be fenced.

d. Abandon the areas in a self-draining and non-impounding condition.

e. All surface debris, scrap metal, discarded wood and unuseable buildings will either be buried or removed from the site.

Reclamation performance surety will be established upon final approval of the mining and reclamation plan.
